Last update: August 23, 2026

Education

Ph.D., Hydraulic Engineering and Sanitation (Hydrology & Water Resources) <i>University of Sao Paulo, Sao Carlos School of Engineering</i> Dissertation: Advances in open source hydroinformatics for flood modeling and disaster education . GPA 4.0/4.0. Awarded best 2023 Ph.D. thesis in engineering at USP Sao Carlos School of Engineering.	Jan. 2020–Nov. 2023
Ph.D., Civil and Environmental Engineering[†] <i>University of Texas at San Antonio</i> Dissertation: Physics-based numerical models applied to sustainable urban design and real-time control for flood mitigation.	Jan. 2020–present
M.Sc., Hydraulic Engineering and Sanitation (Hydrology & Water Resources) <i>University of Sao Paulo, Sao Carlos School of Engineering</i>	Feb. 2018–Dec. 2019
B.Sc., Civil Engineering <i>State University of Maringa, Brazil</i>	Feb. 2013–Nov. 2017

Appointments

Postdoctoral Researcher <i>Stanford University, Department of Earth System Science</i> Stanford Doerr School of Sustainability Reconstructing recent floods in India and California using remote sensing and physically based hydrologic-hydrodynamic modeling; developing machine-learning inference methods to connect flood exposure with medical records. Advisor: Steven Gorelick, Ph.D.	Feb. 2026–present
Postdoctoral Research Associate <i>University of Arizona, Department of Hydrology and Atmospheric Sciences</i> Developed and applied hillslope-storage Boussinesq and land-surface modeling approaches for catchment hydrologic signatures, snow-influenced hydrology, and state-dependent effective material properties using high-resolution Landscape Evolution Observatory data. Advisor: Peter A. Troch, Ph.D.	Jan. 2024–Jan. 2026
Graduate Research Assistant <i>University of Texas at San Antonio, Civil and Environmental Engineering</i> Developed numerical models, stormwater control methods, and field monitoring programs for permeable pavement and urban water-quality projects funded by the City of San Antonio.	Jan. 2023–Dec. 2023
Graduate Research Assistant <i>University of Sao Paulo, Sao Carlos School of Engineering</i> Developed hydrologic/hydrodynamic models and supported field design and monitoring for bioretention and low-impact development systems funded by FAPESP.	Feb. 2018–Dec. 2019
Undergraduate Research Assistant <i>State University of Maringa, Civil Engineering</i> Brazil Conducted undergraduate research on flood mitigation in downtown Umuarama and proposed nature-based solutions to reduce urban inundation impacts.	June 2016–June 2017

Honors, Fellowships, and Research Metrics

Award	Best Ph.D. thesis of 2023 in engineering at the University of Sao Paulo, Sao Carlos School of Engineering, including a R\$ 10,000 award.
Google Scholar	709 citations (since 2021: 702); h-index 14; i10-index 16 (as of July 19, 2026). Profile .
Moore Foundation	Offered Gordon and Betty Moore Foundation scholarship / fellowship support for 2025–2026 (approximately \$70,000); not accepted.
City of San Antonio	Ph.D. project support, approximately \$153,000 USD. Project: Demonstrating the Environmental Benefits of Permeable Paved Surfaces over the Edwards Aquifer .

[†]Dissertation defense on hold while on current postdoctoral appointment due to visa requirements.

CAPES	Ph.D. scholarship (Grant 88887.663281 / 2022-00), R\$ 74,400. Funding source.
FAPESP	M.Sc. scholarship (Process 18/20865-0), R\$ 58,116. Funding source.
FAPESP Regular Research Grant	Project 2017/21940-0, 2018–2020, R\$ 158.243,56.
Undergraduate support	Free tuition by state university scholarship, approximately R\$ 105,000.00.

Selected Research Products (n = 7 of 24 public repositories on GitHub)

Product / repository	Scope and public link
HydroPol2D	Distributed 2D hydrologic-hydrodynamic and water-quality model for overland flow, infiltration, groundwater recharge, shallow groundwater, reservoirs, dam-breaks, snow, and pollutant transport. GitHub: marcusnobrega-eng/HydroPol2D ; docs: HydroPol2D-docs ; article: <i>Journal of Hydrology</i> , DOI: 10.1016/j.jhydrol.2023.129982 .
MIRA	Interactive South America multi-hazard platform for flood, drought, wildfire, socioeconomic vulnerability, and city-priority analysis at 1km resolution. Viewer: riskframeworksa.github.io/data_viewer .
GRIDF	Gridded intensity-duration-frequency curves for Brazil, including national methods for IDF estimation and visualization. GitHub: marcusnobrega-eng/GRIDF ; Earth Engine app: gridf-br .
Huff Curves BR Atlas	A web-based tool applied to all rainfall gauges in Brazil to visualize how rainfall dynamics change over time. For a same rainfall volume and duration, the temporal distribution can increase peak flows in approximately 10%, for example. Viewer: Huff_Curves_BR/docs .
LIMIAR	A web-based river-flood reconstruction tool for all monitored stream gauges in Brazil by using data such as (i) river cross-sections, (ii) water level, (iii) discharge, and (iv) rating curves. GitHub: marcusnobrega-eng/LIMIAR ; docs: marcusnobrega-eng.github.io/LIMIAR .
DRAIN-LID	1D finite-volume model for simulating unsaturated flow in porous media based on Darcy-Richards equations. Specialized hydrodynamic tool for permeable pavements, green roofs, bioretention systems. GitHub: marcusnobrega-eng/DRAIN-LID ; docs: marcusnobrega-eng.github.io/DRAIN-LID .
India Flood Inventory Toolbox (IFI)	By using advanced LLMs scripting, the IFI Toolbox Website reconstruct all recorded flood events in India, categorizing attributes such as damages, fatalities, people affected, and etc from 1970 to 2023. Toolbox for analysis of India Flood Inventory records and related flood-database tools. GitHub: marcusnobrega-eng/IFI_Toolbox ; dashboard/docs: marcusnobrega-eng.github.io/IFI_Toolbox .

Talks and short courses

- **Research talk**, Stanford University, Stanford, CA, Feb. 20, 2026. "Designing Open-Source Tools for Simulating Hydrological Processes: Challenges and Lessons from Building from Scratch."
- **Invited research talk**, Landscape Evolution Observatory / Digital Twin Conference, University of Arizona, Tucson, AZ, Dec. 11, 2025. "Identifying Effective Soil Properties in the Landscape Evolution Observatory."
- **Invited lecture**, **University of Arizona Hydrology and Atmospheric Sciences master's program**, "Fluid Dynamics - Bernoulli's Lecture," Tucson, AZ, Sept. 12, 2025.
- **AGU24 Annual Meeting**, Washington, DC, Dec. 2024. Poster: "Characterizing the State Dependence of Effective Material Properties in a Simplified Hydrologic Hillslope Model."
- **HydroPol2D short course**, University of Sao Paulo, Sao Carlos, Brazil, 2024. Model setup, running, and calibration.
- **HydroPol2D short course for graduate students**, University of Texas at San Antonio, San Antonio, TX, Nov. 21, 2024.
- **Invited class presentation**, **Water Resources System Analysis**, University of Texas at San Antonio, "1D hydrodynamic simulations with HydroHP," San Antonio, TX, Oct. 8, 2024.
- **Conference on Computational Methods in Water Resources**, Tucson, AZ, Oct. 1, 2024. Oral and poster presentations: "Identifying the state dependence of effective material properties in a simplified hydrologic hillslope model" and "Large Scale Fully-Distributed Hydrologic-Hydrodynamic Modeling: Developing an Early-Warning Tool."
- **HydroPol2D tutorial for graduate students**, University of Sao Paulo, Sao Carlos, Brazil, Sept. 1, 2023. Three-day course on fully distributed hydrologic-hydrodynamic modeling.
- **XXV Brazilian Symposium of Water Resources**, Aracaju, Brazil, 2023. Coauthored and supported presentations by undergraduate mentees Enrico Pavan, Lucas F. Roysen, and Milena Rosa de Sousa on HydroPol2D, RTC-Stormwater, and urban flood modeling.
- **Invited talk**, **Hydraulic System Course**, University of Sao Paulo, Sao Carlos, Brazil, Apr. 1, 2023. Presentation on HydroHP-1D and HydroPol2D applications in Amazon basin and urban catchments.
- **Invited undergraduate class presentation**, Vanderbilt University, Nashville, TN, Nov. 29, 2022. Two classes on RTC-Stormwater and real-time control of catchments, reservoirs, and channels.
- **Latin American Hydraulic Congress**, Foz do Iguaçu, Brazil, Nov. 2022. Presented two HydroHP-1D papers; one selected as best paper in its category.
- **National Urban Water Meeting and Symposium on Revitalization of Urban Rivers**, Brasilia, Brazil, Sept. 2022. Presented two conference papers.
- **Second International Conference Water, Megacities and Global Change**, UNESCO, Paris, France, Dec. 2021. Presentation on nature-based solutions and bioretention modeling.
- **Brazilian Symposium of Water Resources**, Belo Horizonte, Brazil, Nov. 2021. Presentation on raster resolution and water-quality modeling in a fully distributed hydrologic-hydrodynamic model.
- **2nd International Symposium on Water System Operations**, Bristol, UK, Sept. 2021. "Real-Time Control of Stormwater Reservoirs for Flood Risk Mitigation."
- **World Environmental and Water Resources Congress**, Las Vegas, NV / online, June 2021. Presented papers on permeable pavement hydrology and distributed runoff/pollutant modeling.
- **AGU Fall Meeting**, New Orleans, LA, Dec. 2021. "Expanding the 2-Dimensional Green-Ampt and Non-linear Reservoir Hydrological Model from SWMM to MATLAB."

- **Advanced Excel short course**, University of Sao Paulo, Sao Carlos School of Engineering, Sao Carlos, Brazil, 2019. One-week course on advanced Excel methods for engineering calculations and data analysis.
- **Brazilian Symposium of Water Resources**, Foz do Iguacu, Brazil, Dec. 2019. Presented papers on inverse modeling of the Pacaembu detention reservoir and orifice discharge sensitivity.

Teaching Experience

CIRTL teaching-development course	2025
<i>University of Arizona</i> Completed the Center for the Integration of Research, Teaching, and Learning (CIRTL) program course through the University of Arizona.	
Teaching Assistant, Fundamentals of Surface Water Hydrology	2024
<i>University of Arizona, Department of Hydrology and Atmospheric Sciences</i> Reviewed and graded assignments, projects, and exams for a graduate hydrology course taught by Peter A. Troch.	
Teaching Assistant, Hydrology I and II for Civil Engineering	2022–2023
<i>University of Sao Paulo</i> Developed supporting materials, spreadsheets, and numerical models; taught selected applied hydrology classes for undergraduate students.	
Teaching Assistant, Hydrology I and II for Civil Engineering	2018–2019
<i>University of Sao Paulo</i> Developed supporting materials and computational exercises for applied hydrology courses.	
Instructor, Financial Mathematics	2015–2017
<i>CIEE (Center for School-Business Integration, Brazil)</i> Taught financial mathematics in the youth apprenticeship program.	
Instructor, Mathematics, Physics, and CAD-Assisted Technical Drawing	2015–2017
<i>Yesbras</i> Taught mathematics, physics, and technical drawing with CAD support.	
Teaching Assistant, Physics I and II	2014–2016
<i>State University of Maringa</i> Led problem-solving sessions and exam preparation for civil and environmental engineering students.	
Teaching Assistant, Physics, Mathematics, and Chemistry	2013–2017
<i>Curso e Colegio Alfa Preparatory School</i> Supported pre-college preparation in physics, mathematics, and chemistry.	

Funding and Proposal Experience

- **NSF Collaborative Research: Enabling Safe and Efficient Restoration of Drinking Water Systems through Multiphase Flow Modeling and Control** (2026–2029; Awards 2606145, 2606146, and 2606147; total collaborative award: \$749,667)
 - **PIs:** Marcio H. Giacomoni (University of Texas at San Antonio), Ahmad F. Taha (Vanderbilt University), and Jose G. Vasconcelos (Auburn University).
 - **Role:** Proposal contributor and project collaborator. Contributed the hydraulic conceptualization and governing equations for multiphase air–water filling and reviewed the modeling and control methodology.
- **HyREx: Enhancing Hydro-Resilience of Brazilian Catchments to Extreme Events in a Changing World** (FAPESP Process 2025/16429-3, 2026–2031; R\$ 520,368.25 + US\$ 20,700 + two undergraduate, two M.Sc., and one TT-IV fellowships)
 - **PI:** Andre Simoes Ballarin, University of Sao Paulo, Sao Carlos School of Engineering.
 - **Role:** Project collaborator on rainfall temporal structure, climate-change effects on flood extremes, and updated flood-design methods.
- **Funded project: Improving Continuous Streamflow Simulations for Beaver Creek, with Special Focus on Wet Winters** (Salt River Project, 2025; awarded \$129,342)
 - **PI:** Peter A. Troch; **Co-Investigator:** Patrick D. Broxton.
 - **Role:** Project researcher. Developed and calibrated the hsB-SM catchment model coupled with SnowPALM, prepared hydrometeorological and landscape data, and evaluated streamflow simulations with emphasis on wet winters.
- **Proposal submission: Improving Continuous Streamflow Simulations for Beaver Creek, with Special Focus on Wet Winters** (submitted to Salt River Project, 2026; proposed budget: \$80,000; not funded)
 - **PI:** Peter A. Troch; **Co-Investigator:** Patrick D. Broxton.
 - **Role:** Full proposal co-author with Peter A. Troch and Patrick D. Broxton. Co-wrote the technical narrative, preliminary analysis, and work plan for coupling SnowPALM with hsB-SM to improve streamflow simulation during wet winters.
- **Proposal development: Multi-Contaminant Exposure in Moab's Backwaters under Climate Change with Integrated Surface–Groundwater and Transport Modeling** (developed for Keck Foundation consideration, 2025; estimated budget: \$1,010,660)
 - **PI:** Peter A. Troch.
 - **Role:** Proposal co-author and hydrologic–hydrodynamic modeler. Co-developed the monitoring and modeling plan coupling surface flow, river–aquifer exchange, and contaminant transport to estimate exposure to ammonia, uranium, salinity/TDS, and nitrate under historical and climate-change scenarios.
- **Analysis of Unit Hydrograph Models for San Antonio Watersheds** (approximate budget: \$49,000; not funded)
 - **PI** - Dr. Marcio H. Giacomoni
 - **Tasks:** I helped to define the methods used to systematically assess the best unit hydrograph theory used for San Antonio observed data. The idea is that the standard PRF 484 unit hydrograph was oversizing the detention ponds in the city. Therefore, investigating the best-fitted unit hydrograph would reduce the associated costs of low-impact development designs.
- **Curbing Climate Change-Induced Floods via Control Theory for Urban Drainage Systems** (estimated budget: \$250,000; not funded)
 - **PI's** - Dr. Marcio H. Giacomoni and Dr. Ahmad F. Taha
 - **Tasks:** Our previous **research** was the starting point of this proposal. We developed a real-time control model that can potentially increase the efficiency of stormwater systems for flood control. In this proposal, we plan to advance the mathematical modeling to include new stormwater systems (e.g., tunnels, dividers) and actuators (e.g., pumps and gates) to optimally control floods via real-time optimization.

- **Alicia Nguyen*** (Ph.D. student, Stanford University, 2026–pres.): composite hazards in India.
- **Shikshita Bhandari*** (Ph.D. student, Stanford University, 2026–pres.): flood effects on socioeconomics in India.
- **Ricardo Augusto de Farias Freire Filho*** (B.Sc., UFPE, 2025): co-advised undergraduate thesis on hydraulic sizing of stepped channels under skimming-flow conditions; developed and benchmarked an Excel-based design routine against SisCCoH.
- **Maria A. R. A. Castro*** (M.Sc./Ph.D., USP, 2023–pres.): Monte Carlo dam-break ensembles; trade-offs across LI/diffusive/full momentum solvers.
- **Mateo Hernandez*** (M.Sc., USP, 2023–pres.): closed-loop flood control with distributed hydro-hydraulic model; HEC-RAS vs HydroHP comparisons.
- **Jalihal Vijay*** (B.Sc., Vanderbilt, 2023–2024): flood modeling in Bellandur - India.
- **Artur A. T. Brasil** (Ph.D., UTSA, 2022–pres.): permeable pavements field study, digital twin forecasting for LIDs.
- **Matheus dos Santos*** (M.Sc., USP, 2022–2024): MPC in urban reservoirs using RTC-Stormwater; prediction-horizon sensitivity.
- **Milena Rosa*** (B.Sc., USP, 2022–2024): HydroPol2D in data-scarce urban basin; pollutant fate/transport mapping, senior project supervision.
- **Enrico Pavan*** (B.Sc., USP, 2022–2023): large-basin HydroPol2D setup; undergraduate research supervision.
- **Lucas F. Roysen*** (B.Sc., USP, 2022–2023): real-time reservoir control; senior project supervision; RTC-Stormwater applications.
- **Luis M. C. Rápalo*** (Ph.D., USP, 2021–2025): HydroPol2D chapters, urban flood forecasting digital twin, flood inundation mapping, flood damage analysis, and serious-games for risk perception.
- **Ivan Cuervo*** (M.Sc., UTSA, 2020–2022): field monitoring (autosamplers, weirs), water-quality analyses, 2-D runoff modeling.
- **Vivian Jochelavicius*** (B.Sc., USP, 2019): IDF curves under climate scenarios; design implications for compensatory techniques.
- **Hugo de Oliveira Fagundes** (UNICAMP, 2026–pres.): temporal distribution of rainfall extremes in Brazil.
- **Andre Simoes Ballarin** (USP, 2025–pres.): climate change impacts on floods and updated design methods to mitigate climate-change rainfall extremes.
- **Paulo T. S. de Oliveira** (UNC Charlotte, 2023–pres.): hydrodynamic-hydrologic modeling, climate change impacts on floods, and updated design methods to mitigate climate-change rainfall extremes.
- **César A. F. do Lago** (Ph.D., UTSA/USP, 2018–pres.): hydrodynamic modeling, deep learning flood downscaling, ANN WSE prediction; co-developer in HydroPol2D applications.
- **Marina B. de Macedo** (Ph.D., UNIFEI/USP, 2018–2022): LIDs, climate/urbanization impacts, modular bioretention design; multiple joint papers.

Professional Service

Ad hoc reviewer work	Performed 73 verified peer reviews for 27 manuscripts and grant submissions across journals including <i>Journal of Hydrology</i> , <i>Water Resources Research</i> , <i>Environmental Modelling & Software</i> , <i>International Journal of Disaster Risk Reduction</i> , <i>Water Research</i> , <i>Journal of Flood Risk Management</i> , <i>Hydrology and Earth System Sciences</i> , and <i>Journal of Hydrologic Engineering</i> .
Conference panelist reviewer	Panelist reviewer for El Día del Agua y la Atmósfera , University of Arizona, March 25, 2025.
Memberships	American Geophysical Union (AGU), 2021–2022 and 2024–present; American Society of Civil Engineers (ASCE), 2020–2021; Brazilian Water Resources Association (ABRH), 2019–2020 and 2021–2022.

Public Outreach

Engineering education	Founder of Engenheiro Planilheiro , a Portuguese-language civil and environmental engineering website with more than 60 numerical tools, 30+ technical articles, and more than 90,000 downloads from users in more than 10 countries.
YouTube	Created Portuguese-language educational videos on civil and environmental engineering topics through Engenheiro Planilheiro .

Press

Hydrologic models	<i>Modelos hidrológicos desenvolvidos por alunos da USP ajudam a prever riscos de desastres</i> [English: Hydrologic models developed by USP students help predict disaster risks], Jornal da USP , Aug. 28, 2024.
